Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Note: This is in response to Amendment filed 02/05/2007.

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

1. Claims 1, 4-6, and 8-12 are rejected under 35 U.S.C. 103(a) as being unpatentable over Banas et al. (U.S. 6,124,523) in view of Fleischman et al. (U.S. 6,494,889).

Banas et al discloses in figures 1 and 2, an elongated tube structure (10) having a flexible film (24,26) of solid polymeric hydrocarbon material; the film (24,26) having inside surface (at 14) facing the axis of the tube (10) and outside surface (16) facing away from the axis of the tube (10); wherein the film (24,26) are being non-foraminous between its ends such that bodily fluids passing through the tube (10) can be contained within the tube (10); a radially expandable support member (22) partially embedded within the film (24,26). However, Banas et al does not disclose that the film (24,26) includes a parylene material as described in claim 1.

Fleischman et al teaches (col. 6, lines 62-64) that it is known in the surgical art to have graft coated with parylene material.

It would have been obvious to one of ordinary skill in the art at the time the invention was made to make the graft of Banas et al coated with parylene material as

taught by Fleichman et al in order to reduce thrombosis or mitigate other risks that potentially decrease the patency of the graft.

Response to Arguments

2. Applicant's arguments filed 02/05/2007 have been fully considered but they are not persuasive. Applicant's argument with respect to claim 1 has been considered but is moot in view of the new ground(s) of rejection.

Conclusion

3. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.
